ACADEMIC RECORD

University of Hong Kong

Sep 2020 - Jun 2025

- Programme: BEng(Mechanical Engineering), Second Class Honours

St. Peter's Senior High School (Kwahu-Ghana)

Sep 2017 - Sep 2020

SAT Superscore 1560/1600;

Oct 2019

SAT Subject Tests (Math Level II, Chemistry, Physics) all 800/800

Nov 2019

CFA Level I

exp Aug 2026

EMPLOYMENT

Graduate Engineering Trainee (Inventory Management), Cathay Pacific

Aug 2025 – present

- Co-developed an inventory optimization model using Palantir Skywise Contour and SparkSQL to identify surplus and depleted aircraft spares across international outstations, supporting replenishment and return decisions.
- Developed Power BI dashboards visualizing global spare inventory status and critical component availability for operational decision-making.
- Automated vendor order follow-up workflows using Power Automate, reducing manual effort by extracting outstanding orders and generating supplier reminder emails.
- Supported process improvement initiatives through data analysis, dashboard development, and digital solution implementation.

Software Engineering Intern- QA Automation, GFO-X

Nov 2024–Apr 2025

- Analyzed derivatives exchange architecture and automated testing frameworks to understand system behavior, execution flows, and performance validation methodologies.
- Executed and validated quantitative operational tests written in Python, PyTest, and Ansible for exchange infrastructure.
- Researched financial market connectivity protocols including FIX and exchange integration workflows.
- Designed and developed a full-stack self-service testing portal enabling external business partners to initiate and monitor automated validation tests.

Software Engineer Internship, HKSTEMA Limited

Jul 2024 – Aug 2024

- Led frontend design and implementation of an AI-powered tutoring platform that transformed written lesson content into on-demand video learning experiences.
- Developed React-based user interfaces and contributed to backend development efforts.
- Conducted preliminary research into AI model selection, system architecture, and product design requirements during project planning stages.
- Collaborated with stakeholders to define technical requirements before project termination due to funding constraints.

Trainee at Gammon Construction (Innovation Team)

Jun 2023- Jun 2024

- Development of Geospatial tools for site progress analysis using ArcGIS Suite. 3D Mesh Generation using Geotagged Drone Images.
- Design, management and implementation of Smart Site Management System.
- Research on integration of robotics into construction and adjacent industries.

SKILLS AND INTERESTS

- **Python** (Intermediate), **SQL**(Intermediate), **Power Bi**, **Power Automate & PowerApps** (Proficient) . Proficient in **Microsoft Office Suite**, **ArcGIS Suite**. **SolidWorks** (Intermediate), **AutoCAD** (Intermediate), **Tableau** (Intermediate), **Blender** (Intermediate)
- Languages - Fluent in **English** and Twi; Intermediate **French**
